

Donations and grants provided by LEO Pharma A/S to hospitals

Name(s) of the hospital/department responsible for the activity, project, equipment or unit	Renal Medical Dept., Aarhus University Hospital
Name of the activity, project, equipment or unit the donation or grant is to support	Investigation of interactions between pulsewave velocity, misc proteins, biomarkers and mortality plus cardiovascular events among dialysis patients
Types of activity, project, equipment or unit for which the donation or grant is being given	Cover part of costs of operating equipments and participation in conference and publications
The purpose of the activity, project, equipment, or unit for which the donation or grant is being made	Clarify the interaction between pulsewave velocity, matrix Gla protein, angiotensin-2 and troponin in relation to mortality and cardiovascular events among dialysis patients in a multicenter follow-up study.
Time frame (if available)	
The amount of funding provided	10,000 DKK
Scope, content and estimated value of benefits in-kind	To clarify the relation between pulsewave velocity, misc proteins, biomarkers and mortality plus cardiovascular events among dialysis patients to improve the future treatment modalities.
